barcode reading profiles with barcode reader sdk in VBScript with ByteScout Data Extraction Suite

Learn to code barcode reading profiles with barcode reader sdk in VBScript: How-To tutorial

The documentation is crafted to assist you to apply the features on your side easily. ByteScout Data Extraction Suite helps with barcode reading profiles with barcode reader sdk in VBScript. ByteScout Data Extraction Suite is the set that includes 3 SDK products for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK.

Want to speed up the application development? Then this VBScript, code samples for VBScript, developers help to speed up the application development and writing a code when using ByteScout Data Extraction Suite. Just copy and paste this VBScript sample code to your VBScript application's code editor, add a reference to ByteScout Data Extraction Suite (if you haven't added yet) and you are ready to go! These VBScript sample examples can be used in one or many applications.

Trial version along with the source code samples for VBScript can be downloaded from our website

Source Code Files:

Profiles.vbs

```vbs
' This example demonstrates the use of profiles. Profiles are set of properties
' allowing to apply them to Reader in any combination quickly. You can use
' predefined profiles or create you own in JSON format like in this example.

' Create Bytescout.PDFExtractor.TextExtractor object
Set reader1 = CreateObject("Bytescout.BarCodeReader.Reader")
reader1.RegistrationName = "demo"
reader1.RegistrationKey = "demo"

' Apply predefined profiles:
' enable Code39;
' enable EAN-13;
' render PDF at 150 DPI resoultion.
reader1.Profiles = "code39, ean13, pdf150dpi"

' Decode and show barcodes from sample1.pdf
reader1.ReadFromFile "sample1.pdf"
For i = 0 To reader1.FoundCount - 1
    WScript.Echo "Found type " & reader1.GetFoundBarcodeType(i) & " barcode with value
Next

Set reader2 = CreateObject("Bytescout.BarCodeReader.Reader")
reader2.RegistrationName = "demo"
reader2.RegistrationKey = "demo"

' Load and apply custom profiles
reader2.LoadProfiles "profiles.json"
reader2.Profiles = "negative-distorted-datamatrix"

' Decode and show barcodes from sample2.png
reader2.ReadFromFile "sample2.png"
For i = 0 To reader2.FoundCount - 1
    WScript.Echo "Found type " & reader2.GetFoundBarcodeType(i) & " barcode with value
Next
```
