

How to extract text from pdf with pdf extractor sdk in VBScript with ByteScout Data Extraction Suite

Continuous learning is a crucial part of computer science and this tutorial shows how to extract text from pdf with pdf extractor sdk in VBScript

The code displayed below will guide you to install an VBScript app to extract text from pdf with pdf extractor sdk. ByteScout Data Extraction Suite is the set that includes 3 SDK products for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK. It can be applied to extract text from pdf with pdf extractor sdk using VBScript.

Want to save time? You will save a lot of time on writing and testing code as you may just take the VBScript code from ByteScout Data Extraction Suite for extract text from pdf with pdf extractor sdk below and use it in your application. IF you want to implement the functionality, just copy and paste this code for VBScript below into your code editor with your app, compile and run your application. Want to see how it works with your data then code testing will allow the function to be tested and work properly.

ByteScout provides the free trial version of ByteScout Data Extraction Suite along with the documentation and source code samples.

Source Code Files:

```
' Create Bytescout.PDFExtractor.TextExtractor object
Set extractor = CreateObject("Bytescout.PDFExtractor.TextExtractor")
extractor.RegistrationName = "demo"
extractor.RegistrationKey = "demo"

' Load sample PDF document
extractor.LoadDocumentFromFile("../..\sample1.pdf")

' Save extracted text to file
extractor.SaveTextToFile("result.txt")

' Open the output file in default associated application
Set shell = CreateObject("WScript.Shell")
shell.Run "result.txt", 1, false
Set shell = Nothing

Set extractor = Nothing
```
