

pdf extraction profiles with pdf extractor sdk in VBScript using ByteScout Data Extraction Suite

Build pdf extraction profiles with pdf extractor sdk in VBScript

:

Step-by-step instructions on how to do pdf extraction profiles with pdf extractor sdk in VBScript

These source code samples are assembled by their programming language and functions they use. ByteScout Data Extraction Suite helps with pdf extraction profiles with pdf extractor sdk in VBScript. ByteScout Data Extraction Suite is the bundle that includes three SDK tools for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK.

If you want to quickly learn then these fast application programming interfaces of ByteScout Data Extraction Suite for VBScript plus the guideline and the VBScript code below will help you quickly learn pdf extraction profiles with pdf extractor sdk. Follow the steps-by-step instructions from the scratch to work and copy and paste code for VBScript into your editor. Want to see how it works with your data then code testing will allow the function to be tested and work properly.

Our website gives free trial version of ByteScout Data Extraction Suite. It includes all these source code samples with the purpose to assist you with your VBScript application implementation.

Source Code Files:

Profiles.vbs

```
' This example demonstrates the use of profiles. Profiles are set of properties
' allowing to apply them to Extractor in any combination quickly. You can use
' predefined profiles or create you own in JSON format like in this example.

' Create Bytescout.PDFExtractor.TextExtractor object
Set extractor = CreateObject("Bytescout.PDFExtractor.TextExtractor")
extractor.RegistrationName = "demo"
extractor.RegistrationKey = "demo"
extractor.OCRLanguageDataFolder = "c:\Program Files\Bytescout PDF Extractor SDK\ocrdata"

' Load sample PDF document
extractor.LoadDocumentFromFile("../..\sample_ocr.pdf")

' Apply predefined profiles
extractor.Profiles = "scanned, no-layout"
' Extract text to file
extractor.SaveTextToFile("result1.txt")

extractor.Reset

' Load another document
extractor.LoadDocumentFromFile("../..\sample_ocr.pdf")

' Load and apply custom profiles
extractor.LoadProfiles("profiles.json")
extractor.Profiles = "keep-formatting, ocr-forced-200dpi"
' Extract text to file
extractor.SaveTextToFile("result2.txt")
```
