

## 70 advanced 3d transition effects in VB.NET and ByteScout Image To Video SDK

### 70 advanced 3d transition effects in VB.NET

Here you may find thousands pre-made source code pieces for easy implementation in your own programming VB.NET projects. 70 advanced 3d transition effects in VB.NET can be implemented with ByteScout Image To Video SDK. ByteScout Image To Video SDK is the SDK that is designed to generate video slideshow with 100+ 2d and 3D transition effects. Can generate WMV, AVI, WEBM video file with adjustable quality, framerate, output video size.

Fast application programming interfaces of ByteScout Image To Video SDK for VB.NET plus the instruction and the VB.NET code below will help you quickly learn 70 advanced 3d transition effects. This VB.NET sample code should be copied and pasted into your application's code editor. Then just compile and run it to see how it works. Enjoy writing a code with ready-to-use sample VB.NET codes to implement 70 advanced 3d transition effects using ByteScout Image To Video SDK.

Our website provides free trial version of ByteScout Image To Video SDK. It comes along with all these source code samples with the goal to help you with your VB.NET application implementation.

Source Code Files:

```
Imports BytescoutImageToVideo

Module Module1

    Sub Main()

        Try
            Console.WriteLine("Converting JPG slides to video, 70 advanced 3D effects,

            ' Create BytescoutImageToVideoLib.ImageToVideo object instance
            Dim converter As ImageToVideo = New ImageToVideo()

            ' Activate the component
            converter.RegistrationName = "demo"
            converter.RegistrationKey = "demo"

            ' Enable transition effects for the first first slide
            converter.UseInEffectForFirstSlide = True

            converter.Slides.DefaultSlideDuration = 1000
            converter.Slides.DefaultSlideEffectDuration = 500

            Dim bChangeSlide As Boolean = True ' temporary variable to change slides

            Dim i As Integer

            ' now try all 67 standard transition effects from 68 to 140
            For i = 68 To 140

                ' Add slide image, set the duration

                Dim slide As Slide

                If (Not bChangeSlide) Then
                    slide = converter.AddImageFromFileName("..\\..\\..\\..\\slide1.jpg")
                Else
                    slide = converter.AddImageFromFileName("..\\..\\..\\..\\slide2.jpg")
                End If

                bChangeSlide = Not bChangeSlide ' switch to use another slide next tim

                slide.InEffect = i ' effect index

            Next

            ' Set output video size
            converter.OutputWidth = 320
            converter.OutputHeight = 240

            ' Set output video file name
            converter.OutputVideoFileName = "result.wmv"

            ' Run the conversion
            converter.RunAndWait()
```

```
' Release resources
System.Runtime.InteropServices.Marshal.ReleaseComObject(converter)

' Open the result video file in default media player
Process.Start("result.wmv")

Console.WriteLine("Done. Press any key to continue...")
Console.ReadKey()

Catch ex As Exception
    Console.WriteLine("Error: " & ex.Message)
    Console.ReadKey()
End Try

End Sub

End Module
```
