## slide effects in VB.NET with ByteScout Image To Video SDK

Tutorial: how to do slide effects in VB.NET

The coding tutorials are designed to help you test the features without need to write your own code. ByteScout Image To Video SDK was made to help with slide effects in VB.NET. ByteScout Image To Video SDK is the SDK that is designed to generate video slideshow with 100+ 2d and 3D transition effects. Can generate WMV, AVI, WEBM video file with adjustable quality, framerate, output video size.

You will save a lot of time on writing and testing code as you may just take the code below and use it in your application. VB.NET sample code is all you need: copy and paste the code to your VB.NET application's code editor, add a reference to ByteScout Image To Video SDK (if you haven't added yet) and you are ready to go! Further enhancement of the code will make it more vigorous.

Free trial version of ByteScout Image To Video SDK is available on our website. Get it to try other samples for VB.NET.

## Source Code Files:

```
Imports BytescoutImageToVideo
Module Module1
    Sub Main()
        Try
            Console.WriteLine("Converting JPG slides to video, please wait...")
            'Create BytescoutImageToVideoLib.ImageToVideo object instance
            Dim converter As ImageToVideo = New ImageToVideo()
            ' Activate the component
            converter.RegistrationName = "demo"
            converter.RegistrationKey = "demo"
            ' Set default "in" effect for slides (you can also set effects for each sin
            converter.Slides.DefaultSlideInEffect = 1 ' teFadeIn (1) - fades in effect
            converter.Slides.DefaultSlideInEffectDuration = 500 ' 500 msec for in effect
            ' Add images and set slide durations and effects
            Dim slide As Slide
            slide = converter.AddImageFromFileName("..\..\.\slide1.jpg")
            slide.Duration = 3000 ' 3000ms = 3s
            slide.VisualEffect = VisualEffectType.veGrayscale ' make the slide graysca
            slide = converter.AddImageFromFileName("..\..\..\slide2.jpg")
            slide.Duration = 3000
            slide.VisualEffect = VisualEffectType.veSepia ' make the slide sepia
            slide = converter.AddImageFromFileName("..\..\..\slide3.jpg")
            slide.Duration = 3000
            slide.RotationAngle = RotationAngle.raRotate90 ' rotate the slide 90 degree
            ' Set output video size
            converter.OutputWidth = 640
            converter.OutputHeight = 480
            ' Set output video file name
            converter.OutputVideoFileName = "result.wmv"
            ' Run the conversion
            converter.RunAndWait()
            ' Release resources
            System.Runtime.InteropServices.Marshal.ReleaseComObject(converter)
            ' Open the result video file in default media player
            Process.Start("result.wmv")
            Console.WriteLine("Done. Press any key to continue...")
            Console.ReadKey()
        Catch ex As Exception
            Console.WriteLine("Error: " & ex.Message)
            Console.ReadKey()
        End Try
    End Sub
```
