

How to set WMV audio format in VBScript and ByteScout Image To Video SDK

Write code in VBScript to set WMV audio format with this step-by-step tutorial

ByteScout tutorials are designed to explain the code for both VBScript beginners and advanced programmers. Want to set WMV audio format in your VBScript app? ByteScout Image To Video SDK is designed for it. ByteScout Image To Video SDK is the software development kit that can take a set of images and generate video slide show from them. Includes built-in support for 100+ of 2-D and 3-D slide transitions effects. Supports output in WMV, AVI, WEBM video formats.

This code snippet below for ByteScout Image To Video SDK works best when you need to quickly set WMV audio format in your VBScript application. Just copy and paste the code into your VBScript application's code and follow the instruction. Enjoy writing a code with ready-to-use sample VBScript codes.

Trial version of ByteScout Image To Video SDK can be downloaded for free from our website. It also includes source code samples for VBScript and other programming languages.

Source Code Files:

```

' Create an instance of BytescoutImageToVideo.ImageToVideo ActiveX object
Set converter = CreateObject("BytescoutImageToVideo.ImageToVideo")

' Activate the component
converter.RegistrationName = "demo"
converter.RegistrationKey = "demo"

' Add images and set the duration for every slide
Set slide = converter.AddImageFromFileName("../..\slide1.jpg")
slide.Duration = 1000 ' 3000ms = 3s

' Set output video size
converter.OutputWidth = 320
converter.OutputHeight = 240

' converter.SetLogFile "log.txt"

' Set background music
converter.ExternalAudioTrackFromFileName = "../..\bgmusic.mp3"

' set current WMV audio codec - we set it to "Windows Media Audio 9"
' to view all available wmv audio codecs use .WMVAudioCodecsCount and GetWMVAudioCodecName
' or you can see all available codecs in the log file (use .SetLogFile("log.txt"))

converter.CurrentWMVAudioCodecName = "Windows Media Audio 9"

' now list available audio formats for current WMV audio codec

sWMVAudioFormatsInfo = ""

For i = 0 to converter.WMVAudioFormatCount - 1
    sWMVAudioFormatsInfo = sWMVAudioFormatsInfo & vbCRLF & CStr(i) & " : " & converter.GetWMVAudioFormatName(i)
Next

MsgBox "WMV audio codec formats for Windows Media Audio 9 audio codec available are:" & sWMVAudioFormatsInfo

' now set wmv audio format to the first available
converter.CurrentWMVAudioFormat = 0

' Set output video file name
converter.OutputVideoFileName = "result.wmv"

' Run the conversion
converter.RunAndWait()

MsgBox "Result.wmv is ready. Script will try to open the video in default media player"

' Open result in default media player
Set shell = CreateObject("WScript.Shell")
shell.Run "result.wmv", 1, false
Set shell = Nothing

Set converter = Nothing
