

sensitive data detector in C# with ByteScout PDF Extractor SDK

sensitive data detector in C#

Writing of the code to sensitive data detector in C# can be done by developers of any level using ByteScout PDF Extractor SDK. Sensitive data detector in C# can be applied with ByteScout PDF Extractor SDK. ByteScout PDF Extractor SDK is the SDK is designed to help developers with pdf tables and pdf data extraction from unstructured documents like pdf, tiff, scans, images, scanned and electronic forms. The library is powered by OCR, computer vision and AI to provide unique functionality like table detection, automatic table structure extraction, data restoration, data restructuring and reconstruction. Supports PDF, TIFF, PNG, JPG images as input and can output CSV, XML, JSON formatted data. Includes full set of utilities like pdf splitter, pdf merger, searchable pdf maker and other utilities.

If you want to quickly learn then these fast application programming interfaces of ByteScout PDF Extractor SDK for C# plus the guideline and the C# code below will help you quickly learn sensitive data detector. If you want to implement this functionality, you should copy and paste code below into your app using code editor. Then compile and run your application. Enjoy writing a code with ready-to-use sample C# codes to add sensitive data detector functions using ByteScout PDF Extractor SDK in C#.

Trial version can be downloaded from our website for free. It contains this and other source code samples for C#.

Source Code Files:

```
using System;
using System.Drawing;
using Bytescout.PDFExtractor;

namespace SensitiveDataDetectorDemo
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create Bytescout.PDFExtractor.SensitiveDataDetector instance
            SensitiveDataDetector sensitiveDataDetector = new SensitiveDataDetector();
            sensitiveDataDetector.RegistrationName = "demo";
            sensitiveDataDetector.RegistrationKey = "demo";

            // Load sample PDF document
            sensitiveDataDetector.LoadDocumentFromFile(@"..\samplePDF_EmailSSN.pdf");

            // Set the location of OCR language data files
            sensitiveDataDetector.OCRLanguageDataFolder = @"c:\Program Files\Bytescout

            // Perform detecting sensitive data
            SensitiveDataDetectionResults detectionResults = sensitiveDataDetector.Per

            // Generate Report
            string report = sensitiveDataDetector.GenerateReport(detectionResults, Sens

            Console.WriteLine(report);

            // Cleanup
            sensitiveDataDetector.Dispose();

            Console.WriteLine();
            Console.WriteLine("Press any key to continue...");
            Console.ReadLine();
        }
    }
}
