

zugferd invoice extraction in C# using ByteScout PDF Extractor SDK

zugferd invoice extraction in C#

We've created and updating regularly our sample code library so you may quickly learn zugferd invoice extraction and the step-by-step process in C#. ByteScout PDF Extractor SDK helps with zugferd invoice extraction in C#. ByteScout PDF Extractor SDK is the Software Development Kit (SDK) that is designed to help developers with data extraction from unstructured documents like pdf, tiff, scans, images, scanned and electronic forms. The library is powered by OCR, computer vision and AI to provide unique functionality like table detection, automatic table structure extraction, data restoration, data restructuring and reconstruction. Supports PDF, TIFF, PNG, JPG images as input and can output CSV, XML, JSON formatted data. Includes full set of utilities like pdf splitter, pdf merger, searchable pdf maker.

The SDK samples like this one below explain how to quickly make your application do zugferd invoice extraction in C# with the help of ByteScout PDF Extractor SDK. In order to implement this functionality, you should copy and paste code below into your app using code editor. Then compile and run your application. Enjoy writing a code with ready-to-use sample C# codes to implement zugferd invoice extraction using ByteScout PDF Extractor SDK.

Visit our website provides for free trial version of ByteScout PDF Extractor SDK. Free trial includes lots of source code samples to help you with your C# project.

Source Code Files:

```
using System;
using Bytescout.PDFExtractor;

namespace ExtractZUGFeRD
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create Bytescout.PDFExtractor.AttachmentExtractor instance
            AttachmentExtractor extractor = new AttachmentExtractor();
            extractor.RegistrationName = "demo";
            extractor.RegistrationKey = "demo";

            // Load sample PDF document
            extractor.LoadDocumentFromFile(@"..\ZUGFeRD-invoice.pdf");

            // Extract the XML invoice that is stored as an attachment
            for (int i = 0; i < extractor.Count; i++)
            {
                Console.WriteLine("Saving XML invoice attachment: " + extractor.GetFile

                // Save file to current folder
                extractor.Save(i, extractor.GetFileName(i));

                Console.WriteLine("Done.");
            }

            // Cleanup
            extractor.Dispose();

            Console.WriteLine();
            Console.WriteLine("Press any key...");
            Console.ReadLine();
        }
    }
}
```
