Source Code Files:

```
Imports System
Imports System.Collections.Generic
Imports System.Text
Imports Bytescout.PDFExtractor
Imports System.Diagnostics

Namespace ConsoleApplication1

    Class Program

        Shared Sub Main(ByVal args As String())

            ' Create Bytescout.PDFExtractor.CSVExtractor instance
            Dim extractor As New CSVExtractor()
            extractor.RegistrationName = "demo"
            extractor.RegistrationKey = "demo"

            ' Load sample PDF document
            extractor.LoadDocumentFromFile("sample3.pdf")

            ' You can change CSV separator symbol (if needed) from "," symbol to another
            ' extractor.CSVSeparatorSymbol = ";"

            ' Save extracted CSV data to file
            extractor.SaveCSVToFile("output.csv")

            ' Cleanup
            extractor.Dispose()

            Console.WriteLine()
            Console.WriteLine("Data has been extracted to 'output.csv' file.")
            Console.WriteLine()
            Console.WriteLine("Press any key to continue and open CSV in default CSV viewer")
            Console.ReadKey()

            ' Open result file in default associated application (for demo purposes)
            Process.Start("output.csv")

        End Sub

    End Class

End Namespace
