How to extract video from PDF in VB.NET and ByteScout PDF Extractor SDK

Write code in VB.NET to extract video from PDF with this step-by-step tutorial

On this page you will learn from code samples for programming in VB.NET.Writing of the code to extract video from PDF in VB.NET can be done by developers of any level using ByteScout PDF Extractor SDK. ByteScout PDF Extractor SDK can extract video from PDF. It can be used from VB.NET. ByteScout PDF Extractor SDK is the SDK is designed to help developers with pdf tables and pdf data extraction from unstructured documents like pdf, tiff, scans, images, scanned and electronic forms. The library is powered by OCR, computer vision and AI to provide unique functionality like table detection, automatic table structure extraction, data restoration, data restructuring and reconstruction. Supports PDF, TIFF, PNG, JPG images as input and can output CSV, XML, JSON formatted data. Includes full set of utilities like pdf splitter, pdf merger, searchable pdf maker and other utilities.

You will save a lot of time on writing and testing code as you may just take the VB.NET code from ByteScout PDF Extractor SDK for extract video from PDF below and use it in your application. In order to implement the functionality, you should copy and paste this code for VB.NET below into your code editor with your app, compile and run your application. Implementing VB.NET application typically includes multiple stages of the software development so even if the functionality works please test it with your data and the production environment.

Trial version of ByteScout PDF Extractor SDK is available for free. Source code samples are included to help you with your VB.NET app.

Source Code Files:

Program.vb

```vb
Imports Bytescout.PDFExtractor

Class Program
    Friend Shared Sub Main(ByVal args As String())

        ' Create Bytescout.PDFExtractor.MultimediaExtractor instance
        Dim extractor As New MultimediaExtractor()
            extractor.RegistrationName = "demo"
            extractor.RegistrationKey = "demo"

        ' Load PDF document
        ' (!) We do not provide the sample document, please load your own.
        extractor.LoadDocumentFromFile("sample.pdf")

        Dim i As Integer = 0

        ' Initialize movies enumeration
        If extractor.GetFirstVideo() Then
            Do
                Dim outputFileName As String = "movie" & i & extractor.GetCurrentVideo

                ' Save movie to file
                extractor.SaveCurrentVideoToFile(outputFileName)

                i = i + 1

            Loop While extractor.GetNextVideo() ' Advance movies enumeration
        End If

        ' Cleanup
            extractor.Dispose()

    End Sub
End Class
```
