Source Code Files:

```
Imports Bytescout.PDFExtractor
Imports System.Diagnostics
Class Program
        Friend Shared Sub Main(args As String())
        Dim inputFiles As String() = New String() {"encrypted1 (password is 'password'
        Using merger As New DocumentMerger("demo", "demo")
            ' Handle `PasswordRequired` event
            AddHandler merger.PasswordRequired, New PasswordEventHandler(AddressOf merger)
            ' Ignore document permissions
            merger.CheckPermissions = False
            merger.Merge(inputFiles, "result.pdf")
        End Using
        Process.Start("result.pdf")
    End Sub
   Private Shared Sub merger_PasswordRequired(sender As Object, document As String, By
        ' Set document password here
        password = "password"
    End Sub
End Class
```
