

# zugferd invoice extraction in VB.NET using ByteScout PDF Extractor SDK

## How to use ByteScout PDF Extractor SDK for zugferd invoice extraction in VB.NET

ByteScout tutorials explain the material for programmers who use VB.NET. Zugferd invoice extraction in VB.NET can be implemented with ByteScout PDF Extractor SDK. ByteScout PDF Extractor SDK is the Software Development Kit (SDK) that is designed to help developers with data extraction from unstructured documents like pdf, tiff, scans, images, scanned and electronic forms. The library is powered by OCR, computer vision and AI to provide unique functionality like table detection, automatic table structure extraction, data restoration, data restructuring and reconstruction. Supports PDF, TIFF, PNG, JPG images as input and can output CSV, XML, JSON formatted data. Includes full set of utilities like pdf splitter, pdf merger, searchable pdf maker.

Fast application programming interfaces of ByteScout PDF Extractor SDK for VB.NET plus the instruction and the VB.NET code below will help you quickly learn zugferd invoice extraction. Follow the instruction from the scratch to work and copy and paste code for VB.NET into your editor. VB.NET application implementation typically includes multiple stages of the software development so even if the functionality works please test it with your data and the production environment.

Our website provides free trial version of ByteScout PDF Extractor SDK. It comes along with all these source code samples with the goal to help you with your VB.NET application implementation.

Source Code Files:

## Program.vb

```
Imports Bytescout.PDFExtractor

Class Program

    Friend Shared Sub Main(args As String())

        ' Create Bytescout.PDFExtractor.AttachmentExtractor instance
        Dim extractor As New AttachmentExtractor()
        extractor.RegistrationName = "demo"
        extractor.RegistrationKey = "demo"

        ' Load sample PDF document
        extractor.LoadDocumentFromFile(".\ZUGFeRD-invoice.pdf")

        Dim i As Integer

        ' Extract the XML invoice that is stored as an attachment
        For i = 0 To extractor.Count - 1

            Console.WriteLine("Saving XML attachment: " + extractor.GetFileName(i))

            ' Save file to current folder
            extractor.Save(i, extractor.GetFileName(i))

            Console.WriteLine("Done.")
        Next

        ' Cleanup
        extractor.Dispose()

        Console.WriteLine()
        Console.WriteLine("Press any key...")
        Console.ReadLine()

    End Sub

End Class
