compare PDF documents in VBScript with ByteScout PDF Extractor SDK

Write code in VBScript to make compare PDF documents with this How-To tutorial

Sample source codes below will show you how to cope with a difficult task, for example, compare PDF documents in VBScript. Compare PDF documents in VBScript can be implemented with ByteScout PDF Extractor SDK. ByteScout PDF Extractor SDK is the SDK is designed to help developers with pdf tables and pdf data extraction from unstructured documents like pdf, tiff, scans, images, scanned and electronic forms. The library is powered by OCR, computer vision and AI to provide unique functionality like table detection, automatic table structure extraction, data restoration, data restructuring and reconstruction. Supports PDF, TIFF, PNG, JPG images as input and can output CSV, XML, JSON formatted data. Includes full set of utilities like pdf splitter, pdf merger, searchable pdf maker and other utilities.

You will save a lot of time on writing and testing code as you may just take the code below and use it in your application. In order to implement this functionality, you should copy and paste code below into your app using code editor. Then compile and run your application. You can use these VBScript sample examples in one or many applications.

Trial version can be downloaded from our website. Source code samples for VBScript and documentation are included.

Source Code Files:

CompareDocuments.vbs

```vbs
' Create TextComparer object
Set comparer = CreateObject("Bytescout.PDFExtractor.TextComparer")
comparer.RegistrationName = "demo"
comparer.RegistrationKey = "demo"

'Compare documents
comparer.Compare "..\..\comparison1.pdf", "..\..\comparison2.pdf"

' Generate report
comparer.GenerateHtmlReport "report.html"

' Open output file in default associated application
Set shell = CreateObject("WScript.Shell")
shell.Run "report.html", 1, false
```
