

How to extract attachments from PDF in VBScript with ByteScout PDF Extractor SDK

Write code in VBScript to extract attachments from PDF with this step-by-step tutorial

These sample source codes on this page below are demonstrating how to extract attachments from PDF in VBScript. ByteScout PDF Extractor SDK is the Software Development Kit (SDK) that is designed to help developers with data extraction from unstructured documents like pdf, tiff, scans, images, scanned and electronic forms. The library is powered by OCR, computer vision and AI to provide unique functionality like table detection, automatic table structure extraction, data restoration, data restructuring and reconstruction. Supports PDF, TIFF, PNG, JPG images as input and can output CSV, XML, JSON formatted data. Includes full set of utilities like pdf splitter, pdf merger, searchable pdf maker and you can use it to extract attachments from PDF with VBScript.

VBScript code samples for VBScript developers help to speed up coding of your application when using ByteScout PDF Extractor SDK. Follow the instructions from the scratch to work and copy the VBScript code. Test VBScript sample code examples whether they respond your needs and requirements for the project.

You can download free trial version of ByteScout PDF Extractor SDK from our website to see and try many others source code samples for VBScript.

Source Code Files:

ExtractAttachments.vbs

```
' Create Bytescout.PDFExtractor.extractor object
Set extractor = CreateObject("Bytescout.PDFExtractor.AttachmentExtractor")
extractor.RegistrationName = "demo"
extractor.RegistrationKey = "demo"

' Load sample PDF document with embedded attachments
extractor.LoadDocumentFromFile("../..\attachments.pdf")

' Iterate through attachments and save them
For i = 0 To extractor.Count - 1
    ' Save file to current folder with original name
    extractor.Save i, extractor.GetFileName(i)
Next

MsgBox "Done: " & CStr(extractor.Count) & " attachments extracted"

Set extractor = Nothing
```
