

# How to convert HTML to PDF in VB.NET with ByteScout PDF SDK

The tutorial below will demonstrate how to convert HTML to PDF in VB.NET

The sample source code below will teach you how to convert HTML to PDF in VB.NET. ByteScout PDF SDK is the component to help programmers in generating new pdf files, modifying and updating existing pdf documents or pdf forms. Provides support for auto-filling pdf forms, adding text with adjustable font, style, size, font family, new form fields, vector and raster drawings and you can use it to convert HTML to PDF with VB.NET.

You will save a lot of time on writing and testing code as you may just take the VB.NET code from ByteScout PDF SDK for convert HTML to PDF below and use it in your application. Just copy and paste the code into your VB.NET application's code and follow the instruction. This basic programming language sample code for VB.NET will do the whole work for you to convert HTML to PDF.

Free trial version of ByteScout PDF SDK is available for download from our website. Get it to try other source code samples for VB.NET.

VB.NET - Module1.vb

```
Imports System.Drawing.Printing
Imports Bytescout.PDF.Converters

Module Module1

    <STAThread>
    Sub Main()

        Using converter As New HtmlToPdfConverter()

            converter.PageSize = PaperKind.A4
            converter.Orientation = PaperOrientation.Portrait
            converter.Footer = "FOOTER TEXT" ' optional footer text

            converter.ConvertHtmlToPdf("sample.html", "result.pdf")

            ' You can also pass a link instead of the input file:
            'converter.ConvertHtmlToPdf("http://google.com",
"result.pdf")

        End Using

        ' Open result file in default PDF viewer
        Process.Start("result.pdf")
    End Sub
End Module
```

End Sub

End Module
