

fill fields in PDF form in VBScript and VB6 with ByteScout PDF SDK

Tutorial: how to do fill fields in PDF form in VBScript and VB6

Here you may find thousands pre-made source code pieces for easy implementation in your own programming VBScript and VB6 projects. ByteScout PDF SDK was made to help with fill fields in PDF form in VBScript and VB6. ByteScout PDF SDK is the component to help programmers in generating new pdf files, modifying and updating existing pdf documents or pdf forms. Provides support for auto-filling pdf forms, adding text with adjustable font, style, size, font family, new form fields, vector and raster drawings.

This rich sample source code in VBScript and VB6 for ByteScout PDF SDK includes the number of functions and options you should do calling the API to implement fill fields in PDF form. In order to implement this functionality, you should copy and paste code below into your app using code editor. Then compile and run your application. Use of ByteScout PDF SDK in VBScript and VB6 is also explained in the documentation included along with the product.

Free trial version of ByteScout PDF SDK is available on our website. Get it to try other samples for VBScript and VB6.

Source Code Files:

```
' This example demonstrates how to fill PDF form programmatically.

' Create ByteScout.PDF.Document object
Set pdfDocument = CreateObject("ByteScout.PDF.Document")
pdfDocument.RegistrationName = "demo"
pdfDocument.RegistrationKey = "demo"

' Load PDF form
pdfDocument.Load("form.pdf")

Set page = pdfDocument.Pages.Item(0)

' Get widget by its name and change value
page.Annotations.Item_2("editBox1").Text = "Test 123"
page.Annotations.Item_2("editBox2").Text = "Test 456"
page.Annotations.Item_2("checkBox1").Checked = True

' Save document to file
pdfDocument.Save("result.pdf")

' Open document in default PDF viewer app
Set shell = CreateObject("WScript.Shell")
shell.Run "result.pdf", 1, false
```
