

How to add goto action to pdf with pdf sdk in C# and ByteScout PDF Suite

This code in C# shows how to add goto action to pdf with pdf sdk with this how to tutorial

The sample shows instructions and algorithm of how to add goto action to pdf with pdf sdk and how to make it run in your C# application. ByteScout PDF Suite can add goto action to pdf with pdf sdk. It can be applied from C#. ByteScout PDF Suite is the set that includes 6 SDK products to work with PDF from generating rich PDF reports to extracting data from PDF documents and converting them to HTML. This bundle includes PDF (Generator) SDK, PDF Renderer SDK, PDF Extractor SDK, PDF to HTML SDK, PDF Viewer SDK and PDF Generator SDK for Javascript.

These C# code samples for C# guide developers to speed up coding of the application when using ByteScout PDF Suite. This C# sample code is all you need for your app. Just copy and paste the code, add references (if needs to) and you are all set! Applying C# application mostly includes various stages of the software development so even if the functionality works please test it with your data and the production environment.

You can download free trial version of ByteScout PDF Suite from our website with this and other source code samples for C#.

Source Code Files:

```
using System.Diagnostics;
using Bytescout.PDF;

namespace GoToActionExample
{
    /// <summary>
    /// This example demonstrates how to create a button with GoTo action.
    /// </summary>
    class Program
    {
        static void Main()
        {
            // Create new document
            Document pdfDocument = new Document();
            pdfDocument.RegistrationName = "demo";
            pdfDocument.RegistrationKey = "demo";

            // Add pages
            Page page1 = new Page(PaperFormat.A4);
            pdfDocument.Pages.Add(page1);
            Page page2 = new Page(PaperFormat.A4);
            pdfDocument.Pages.Add(page2);

            Font font = new Font(StandardFonts.Times, 18);
            Brush brush = new SolidBrush();

            // Mark action target with text
            page2.Canvas.DrawString("Action target", font, brush, 20, 200);

            // Create button
            PushButton button = new PushButton(20, 20, 100, 25, "button1");
            button.Caption = "Go To Page 2";
            // Create action to go to page 2 at 200 points from the top
            button.OnActivated = new GoToAction(new Destination(page2, 200));

            page1.Annotations.Add(button);

            // Save document to file
            pdfDocument.Save("result.pdf");

            // Cleanup
            pdfDocument.Dispose();

            // Open result document in default associated application (for demo purposes)
            ProcessStartInfo processStartInfo = new ProcessStartInfo("result.pdf");
            processStartInfo.UseShellExecute = true;
            Process.Start(processStartInfo);
        }
    }
}
```
