

How to add textfield to pdf form with pdf sdk in C# using ByteScout PDF Suite

Continuous learning is a crucial part of computer science and this tutorial shows how to add textfield to pdf form with pdf sdk in C#

These source code samples are assembled by their programming language and functions they apply. What is ByteScout PDF Suite? It is the set that includes 6 SDK products to work with PDF from generating rich PDF reports to extracting data from PDF documents and converting them to HTML. This bundle includes PDF (Generator) SDK, PDF Renderer SDK, PDF Extractor SDK, PDF to HTML SDK, PDF Viewer SDK and PDF Generator SDK for Javascript. It can help you to add textfield to pdf form with pdf sdk in your C# application.

The following code snippet for ByteScout PDF Suite works best when you need to quickly add textfield to pdf form with pdf sdk in your C# application. Simply copy and paste in your C# project or application you and then run your app! Complete and detailed tutorials and documentation are available along with installed ByteScout PDF Suite if you'd like to learn more about the topic and the details of the API.

ByteScout provides the free trial version of ByteScout PDF Suite along with the documentation and source code samples.

Source Code Files:

```
using System.Diagnostics;
using Bytescout.PDF;

namespace TextFields
{
    /// <summary>
    /// This example demonstrates how text fields and theirs variations.
    /// </summary>
    class Program
    {
        static void Main()
        {
            // Create new document
            Document pdfDocument = new Document();
            pdfDocument.RegistrationName = "demo";
            pdfDocument.RegistrationKey = "demo";
            // Add page
            Page page = new Page(PaperFormat.A4);
            pdfDocument.Pages.Add(page);

            // Add simple text field with default properties
            EditText edit1 = new EditText(20, 20, 120, 25, "editBox1");
            edit1.Text = "One two three";
            page.Annotations.Add(edit1);

            // Add password box
            EditText edit2 = new EditText(20, 50, 120, 25, "editBox2");
            edit2.Text = "password";
            edit2.Password = true;
            page.Annotations.Add(edit2);

            // Add multiline text field
            EditText edit3 = new EditText(20, 80, 120, 50, "editBox3");
            edit3.Multiline = true;
            edit3.Text = "The quick brown fox jumps over, the lazy dog.";
            page.Annotations.Add(edit3);

            // Demonstrate various decoration properties
            EditText edit4 = new EditText(20, 135, 120, 30, "editBox4");
            edit4.Text = "Decorated text field";
            edit4.TextAlign = TextAlign.Right;
            edit4.BackgroundColor = new ColorRGB(255, 240, 240);
            edit4.BorderWidth = 2;
            edit4.BorderStyle = BorderStyle.Dashed;
            edit4.BorderColor = new ColorRGB(128, 0, 0);
            edit4.FontColor = new ColorRGB(128, 0, 0);
            edit4.Font.Size = 9;
            page.Annotations.Add(edit4);

            // Save document to file
            pdfDocument.Save("result.pdf");

            // Cleanup
        }
    }
}
```

```
pdfDocument.Dispose();

// Open result document in default associated application (for demo purposes)
ProcessStartInfo processStartInfo = new ProcessStartInfo("result.pdf");
processStartInfo.UseShellExecute = true;
Process.Start(processStartInfo);
    }
}
}
```
