Source Code Files:

Program.vb

```
Imports Bytescout.PDFExtractor
Imports System.Diagnostics

Class Program

    Friend Shared Sub Main(args As String())

        Dim inputFiles As String() = New String() {"encrypted1 (password is 'password'"]

        Using merger As New DocumentMerger("demo", "demo")

            ' Handle `PasswordRequired` event
            AddHandler merger.PasswordRequired, New PasswordEventHandler(AddressOf merger.PasswordRequired)

            ' Ignore document permissions
            merger.CheckPermissions = False

            merger.Merge(inputFiles, "result.pdf")
        End Using

        Process.Start("result.pdf")

    End Sub

    Private Shared Sub merger_PasswordRequired(sender As Object, document As String, ByRef password As String)
        ' Set document password here
        password = "password"
    End Sub
End Class
```
