

## How to split protected pdf document with pdf extractor sdk in VB.NET and ByteScout PDF Suite

Continuous learning is a crucial part of computer science and this tutorial shows how to split protected pdf document with pdf extractor sdk in VB.NET

Split protected pdf document with pdf extractor sdk is simple to apply in VB.NET if you use these source codes below. Want to split protected pdf document with pdf extractor sdk in your VB.NET app? ByteScout PDF Suite is designed for it. ByteScout PDF Suite is the bundle that provides six different SDK libraries to work with PDF from generating rich PDF reports to extracting data from PDF documents and converting them to HTML. This bundle includes PDF (Generator) SDK, PDF Renderer SDK, PDF Extractor SDK, PDF to HTML SDK, PDF Viewer SDK and PDF Generator SDK for Javascript.

The SDK samples given below describe how to quickly make your application do split protected pdf document with pdf extractor sdk in VB.NET with the help of ByteScout PDF Suite. This VB.NET sample code is all you need for your app. Just copy and paste the code, add references (if needs to) and you are all set! Want to see how it works with your data then code testing will allow the function to be tested and work properly.

All these programming tutorials along with source code samples and ByteScout free trial version are available for download from our website.

Source Code Files:

## Program.vb

```
Imports Bytescout.PDFExtractor

Class Program

    Friend Shared Sub Main(args As String())

        Dim inputFile As String = "encrypted (password is 'password').pdf"

        Using splitter As New DocumentSplitter("demo", "demo")

            ' Handle `PasswordRequired` event
            AddHandler splitter.PasswordRequired, New PasswordEventHandler(AddressOf splitter_PasswordRequired)

            ' Ignore document permissions
            splitter.CheckPermissions = False

            ' Split document
            splitter.Split(inputFile, "part1.pdf", "part2.pdf", 3)
        End Using

        Console.WriteLine()
        Console.WriteLine("Press any key...")
        Console.ReadKey()

    End Sub

    Private Shared Sub splitter_PasswordRequired(sender As Object, document As String,
        ' Ask user for password And put it to `Password` property.
        password = "password"
    End Sub

End Class
```
