# How to find text in pdf using regex with pdf extractor sdk in VBScript and ByteScout PDF Suite

Learn to find text in pdf using regex with pdf extractor sdk in VBScript

The documentation is designed for a specific purpose to help you to apply the features on your side. ByteScout PDF Suite is the bundle that provides six different SDK libraries to work with PDF from generating rich PDF reports to extracting data from PDF documents and converting them to HTML. This bundle includes PDF (Generator) SDK, PDF Renderer SDK, PDF Extractor SDK, PDF to HTML SDK, PDF Viewer SDK and PDF Generator SDK for Javascript and you can use it to find text in pdf using regex with pdf extractor sdk with VBScript.

These VBScript code samples for VBScript guide developers to speed up coding of the application when using ByteScout PDF Suite. This VBScript sample code is all you need for your app. Just copy and paste the code, add references (if needs to) and you are all set! If you want to use these VBScript sample examples in one or many applications then they can be used easily.

All these programming tutorials along with source code samples and ByteScout free trial version are available for download from our website.

# Source Code Files:

FindTextUsingRegex.vbs

```vbs
' Create Bytescout.PDFExtractor.TextExtractor object
Set extractor = CreateObject("Bytescout.PDFExtractor.TextExtractor")
extractor.RegistrationName = "demo"
extractor.RegistrationKey = "demo"

' Load sample PDF document
extractor.LoadDocumentFromFile("..\..\Invoice.pdf")

extractor.RegexSearch = True ' Turn on the regex search
pattern = "[0-9]{2}/[0-9]{2}/[0-9]{4}" ' Search dates in format 'mm/dd/yyyy'

' Get page count
pageCount = extractor.GetPageCount()

For i = 0 to PageCount - 1
    If extractor.Find(i, pattern, false) Then ' Parameters are: page index, string to
        Do
            extractedString = extractor.FoundText.Text
            MsgBox "Found match on page #" & CStr(i) & ": " & extractedString
            extractor.ResetExtractionArea()
        Loop While extractor.FindNext
    End If
Next

MsgBox "Done"

Set extractor = Nothing
```
