

How to convert PDF XFA form to XML with PDF extractor SDK in C# with ByteScout Premium Suite

Step-by-step tutorial on how to convert PDF XFA form to XML with PDF extractor SDK in C#

We made thousands of pre-made source code pieces for easy implementation in your own programming projects. ByteScout Premium Suite is the set that includes 12 SDK products from ByteScout including tools and components for PDF, barcodes, spreadsheets, screen video recording. It can be applied to convert PDF XFA form to XML with PDF extractor SDK using C#.

Want to save time? You will save a lot of time on writing and testing code as you may just take the C# code from ByteScout Premium Suite for convert PDF XFA form to XML with PDF extractor SDK below and use it in your application. IF you want to implement the functionality, just copy and paste this code for C# below into your code editor with your app, compile and run your application. Enjoy writing a code with ready-to-use sample codes in C#.

You can download free trial version of ByteScout Premium Suite from our website to see and try many others source code samples for C#.

Source Code Files:

```
using System;
using Bytescout.PDFExtractor;

namespace XFAFormToXML
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create Bytescout.PDFExtractor.XFAFormExtractor instance
            XFAFormExtractor extractor = new XFAFormExtractor();
            extractor.RegistrationName = "demo";
            extractor.RegistrationKey = "demo";

            // Load PDF document
            // (!) We do not provide the sample document, please load your own.
            extractor.LoadDocumentFromFile("samplexfa.pdf");

            // Enumerate XFA form content part types
            foreach (XFAFormContentType contentType in Enum.GetValues(typeof(XFAFormCo
            {
                // Get count of content parts of specified type
                int partCount = extractor.GetCount(contentType);

                // Save parts as XML files
                for (int i = 0; i < partCount; i++)
                {
                    string fileName = contentType.ToString() + i + ".xml";
                    extractor.SaveToFile(contentType, i, fileName);
                    Console.WriteLine("Saved form part " + fileName);
                }
            }

            // Cleanup
            extractor.Dispose();

            Console.WriteLine();
            Console.WriteLine("Press any key to continue...");
            Console.ReadLine();
        }
    }
}
