

How to decode pzn barcode with barcode reader sdk in C# and ByteScout Premium Suite

Step-by-step tutorial on how to decode pzn barcode with barcode reader sdk in C#

These sample source codes on this page below are displaying how to decode pzn barcode with barcode reader sdk in C#. Want to decode pzn barcode with barcode reader sdk in your C# app? ByteScout Premium Suite is designed for it. ByteScout Premium Suite is the set that includes 12 SDK products from ByteScout including tools and components for PDF, barcodes, spreadsheets, screen video recording.

Want to save time? You will save a lot of time on writing and testing code as you may just take the C# code from ByteScout Premium Suite for decode pzn barcode with barcode reader sdk below and use it in your application. Just copy and paste the code into your C# application's code and follow the instructions. This basic programming language sample code for C# will do the whole work for you to decode pzn barcode with barcode reader sdk.

You can download free trial version of ByteScout Premium Suite from our website to see and try many others source code samples for C#.

Source Code Files:

```
using System;
using System.IO;
using Bytescout.BarCodeReader;

namespace ReadPZN
{
    class Program
    {
        const string ImageFile = "PZN.png";

        static void Main()
        {
            Console.WriteLine("Reading barcode(s) from image {0}", Path.GetFullPath(ImageFile));

            Reader reader = new Reader();
            reader.RegistrationName = "demo";
            reader.RegistrationKey = "demo";

            // Set barcode type to find
            reader.BarcodeTypesToFind.PZN = true; // "PZN" barcode type is the same as EAN-13

            /* -----
            NOTE: We can read barcodes from specific page to increase performance.
            For sample please refer to "Decoding barcodes from PDF by pages" program.
            ----- */

            // Read barcodes
            FoundBarcode[] barcodes = reader.ReadFrom(ImageFile);

            foreach (FoundBarcode barcode in barcodes)
            {
                Console.WriteLine("Found barcode with type '{0}' and value '{1}'", barcode.Type, barcode.Value);
            }

            // Cleanup
            reader.Dispose();

            Console.WriteLine("Press any key to exit..");
            Console.ReadKey();
        }
    }
}
