

## How to merge protected PDF documents with PDF extractor SDK in C# and ByteScout Premium Suite

Continuous learning is a crucial part of computer science and this tutorial shows how to merge protected PDF documents with PDF extractor SDK in C#

An easy to understand sample source code to learn how to merge protected PDF documents with PDF extractor SDK in C# ByteScout Premium Suite can merge protected PDF documents with PDF extractor SDK. It can be applied from C#. ByteScout Premium Suite is the set that includes 12 SDK products from ByteScout including tools and components for PDF, barcodes, spreadsheets, screen video recording.

The SDK samples given below describe how to quickly make your application do merge protected PDF documents with PDF extractor SDK in C# with the help of ByteScout Premium Suite. Follow the instructions from scratch to work and copy the C# code. Applying C# application mostly includes various stages of the software development so even if the functionality works please test it with your data and the production environment.

You can download free trial version of ByteScout Premium Suite from our website to see and try many others source code samples for C#.

Source Code Files:

```
using System.Diagnostics;
using Bytescout.PDFExtractor;

namespace MergeDocuments
{
    //
    // This example demonstrates how to provide password for protected PDF files.
    //
    class Program
    {
        static void Main(string[] args)
        {
            string[] inputFiles = new string[]
            {
                @"..\encrypted1 (password is 'password').pdf",
                @"..\encrypted2 (password is 'password').pdf",
            };

            using (DocumentMerger merger = new DocumentMerger("demo", "demo"))
            {
                // Handle `PasswordRequired` event
                merger.PasswordRequired += new PasswordEventHandler(merger_PasswordReq

                // Ignore document permissions
                merger.CheckPermissions = false;

                merger.Merge(inputFiles, @"..\result.pdf");
            }

            // Open result document in default associated application (for demo purpos
            ProcessStartInfo processStartInfo = new ProcessStartInfo("result.pdf");
            processStartInfo.UseShellExecute = true;
            Process.Start(processStartInfo);
        }

        static void merger_PasswordRequired(object sender, string document, ref string
        {
            // Ask user for password and return it using `password` parameter
            password = "password";
        }
    }
}
