

## How to set configuration profiles with PDF extractor SDK in C# and ByteScout Premium Suite

This code in C# shows how to set configuration profiles with PDF extractor SDK with this how to tutorial

ByteScout simple and easy to understand tutorials are planned to describe the code for both C# beginners and advanced programmers. Want to set configuration profiles with PDF extractor SDK in your C# app? ByteScout Premium Suite is designed for it. ByteScout Premium Suite is the bundle that includes twelve SDK products from ByteScout including tools and components for PDF, barcodes, spreadsheets, screen video recording.

This prolific sample source code in C# for ByteScout Premium Suite contains various functions and other necessary options you should do calling the API to set configuration profiles with PDF extractor SDK. Just copy and paste the code into your C# application's code and follow the instructions. Applying C# application mostly includes various stages of the software development so even if the functionality works please test it with your data and the production environment.

All these programming tutorials along with source code samples and ByteScout free trial version are available for download from our website.

Source Code Files:

```

using System;
using Bytescout.PDFExtractor;

namespace Profiles
{
    /// <summary>
    /// This example demonstrates the use of profiles. Profiles are set of properties
    /// allowing to apply them to Extractor in any combination quickly. You can use
    /// predefined profiles or create you own in JSON format like in this example.
    /// </summary>
    class Program
    {
        static void Main(string[] args)
        {
            // Create Bytescout.PDFExtractor.TextExtractor instance
            TextExtractor extractor = new TextExtractor();
            extractor.RegistrationName = "demo";
            extractor.RegistrationKey = "demo";
            extractor.OCRLanguageDataFolder = @"c:\Program Files\Bytescout PDF Extractor";

            // Load sample PDF document
            extractor.LoadDocumentFromFile("sample_ocr.pdf");

            // Apply predefined profiles
            extractor.Profiles = "ocr, newspaper-layout";
            // Extract text to file
            extractor.SaveTextToFile("result1.txt");

            extractor.Reset();

            // Load another document
            extractor.LoadDocumentFromFile("sample_ocr.pdf");

            // Load and apply custom profiles
            extractor.LoadProfiles("profiles.json");
            extractor.Profiles = "keep-formatting, ocr-forced-200dpi";
            // Extract text to file
            extractor.SaveTextToFile("result2.txt");

            // Cleanup
            extractor.Dispose();

            // See result files in "bin\Debug" folder
        }
    }
}
