How to decode codablock f barcode with barcode reader sdk in VB.NET using ByteScout Premium Suite

Step-by-step tutorial on how to decode codablock f barcode with barcode reader sdk in VB.NET

On this page you will learn from code samples for programming in VB.NET.Writing of the code to decode codablock f barcode with barcode reader sdk in VB.NET can be executed by programmers of any level using ByteScout Premium Suite. ByteScout Premium Suite: the bundle that includes twelve SDK products from ByteScout including tools and components for PDF, barcodes, spreadsheets, screen video recording. It can decode codablock f barcode with barcode reader sdk in VB.NET.

These VB.NET code samples for VB.NET guide developers to speed up coding of the application when using ByteScout Premium Suite. Follow the instructions from scratch to work and copy the VB.NET code. Applying VB.NET application mostly includes various stages of the software development so even if the functionality works please test it with your data and the production environment.

ByteScout Premium Suite free trial version is available on our website. VB.NET and other programming languages are supported.

Source Code Files:

```
Imports System.IO
Imports Bytescout.BarCodeReader
Module Module1
    Sub Main()
        Const imageFile As String = "codablockF.png"
        Console.WriteLine("Reading barcode(s) from image {0}", Path.GetFullPath(imageF
        Dim reader As New Reader()
        reader.RegistrationName = "demo"
                reader.RegistrationKey = "demo"
        ' <u>Set barcode</u> type to find
        reader.BarcodeTypesToFind.CodablockF = True
        ' NOTE: We can read barcodes from specific page to increase performance .
        ' For sample please refer to "Decoding barcodes from PDF by pages" program.
        ' Read barcodes
        Dim barcodes As FoundBarcode() = reader.ReadFrom(imageFile)
        For Each barcode As FoundBarcode In barcodes
            Console.WriteLine("Found barcode with type '{0}' and value '{1}'", barcode
        Next
        ' Cleanup
        reader.Dispose()
        Console.WriteLine("Press any key to exit..")
        Console.ReadKey()
    End Sub
End Module
```
