Program.vb

```vb
Imports System.Diagnostics
Imports System.Text
Imports Bytescout.BarCode

Class Program
        Friend Shared Sub Main(args As String())
                ' Create Barcode component instance
                Using barcode As New Barcode()
                        barcode.RegistrationName = "demo"
                        barcode.RegistrationKey = "demo"

                        ' Set barcode type
                barcode.Symbology = SymbologyType.PDF417
                        ' Force binary mode
                barcode.Options.PDF417CompactionMode = PDF417CompactionMode.Binary

                        ' Sample byte array to use as value
                Dim byteArray As Byte() = New Byte() {0, 10, 11, 12, 13, 14, 15, &HFF}

                        ' Set value by converting byte array to string
                barcode.Value = Encoding.Default.GetString(byteArray)

                        ' Save barcode image
                        barcode.SaveImage("result.png")

                        ' Open output image in default associated application
                        Process.Start("result.png")
                End Using
        End Sub
End Class
```
