Source Code Files:

```
Imports Bytescout.PDFExtractor

Module Program

    Sub Main()

        Try

            Using docOptimizer As New DocumentOptimizer("demo", "demo")

                'Set Optimization Options
                Dim OptimizationOptions = New OptimizationOptions

                'This will resize high resolution images
                OptimizationOptions.ResampleImages = True

                'Set image optimization format
                'OptimizationOptions.ImageOptimizationFormat = ImageOptimizationFormat

                'Control Optimized image quality, for further fine grained control
                'OptimizationOptions.JPEGQuality = 10

                'Perform Optimization
                docOptimizer.OptimizeDocument("sample.pdf", "sample_optimized.pdf", Opt

                'Get Optimized file info
                Dim fileInfo_Sample = New System.IO.FileInfo("sample.pdf")
                Dim fileInfo_SampleOptimized = New System.IO.FileInfo("sample_optimized

                'Write Stats
                Console.WriteLine("Source File Size: " + fileInfo_Sample.Length.ToString)
                Console.WriteLine("Source File Optimized to Size: " + fileInfo_SampleOp

            End Using

            Catch ex As Exception
                Console.WriteLine(ex.Message)
            End Try

            Console.WriteLine("Press any key to exit...")
            Console.ReadLine()

        End Sub

    End Module
```
