Source Code Files:

```
Imports System.Text
Imports Bytescout.PDFExtractor

Module Program

    Sub Main()

        Try

            ' Files
            Dim fileName As String = "hindiText.pdf"
            Dim destFileName As String = "extractedText.txt"

            ' Read all text from pdf file
            Dim extractor As TextExtractor = New TextExtractor

            ' Load PDF document
            extractor.LoadDocumentFromFile(fileName)

            ' Option 1: Extract all text and write to destination file
            extractor.SaveTextToFile(destFileName, encoding := Encoding.Unicode)

            Console.WriteLine("All extracted text (hindi) written successfully to dest")

            Process.Start(destFileName)

            ' Option 2: Read all text to string variable
            'Dim allText As String = extractor.GetText

            ' Cleanup
            extractor.Dispose()

            Catch ex As Exception
                Console.WriteLine(ex.Message)
            End Try

            Console.WriteLine()
            Console.WriteLine("Press any key to continue...")
            Console.ReadLine()

        End Sub

    End Module
```
