

## How to convert pdf to json with images with pdf extractor sdk in VBScript and ByteScout Premium Suite

Step-by-step tutorial on how to convert pdf to json with images with pdf extractor sdk in VBScript

We made thousands of pre-made source code pieces for easy implementation in your own programming projects. ByteScout Premium Suite can convert pdf to json with images with pdf extractor sdk. It can be applied from VBScript. ByteScout Premium Suite is the set that includes 12 SDK products from ByteScout including tools and components for PDF, barcodes, spreadsheets, screen video recording.

These VBScript code samples for VBScript guide developers to speed up coding of the application when using ByteScout Premium Suite. IF you want to implement the functionality, just copy and paste this code for VBScript below into your code editor with your app, compile and run your application. Applying VBScript application mostly includes various stages of the software development so even if the functionality works please test it with your data and the production environment.

The trial version of ByteScout Premium Suite can be downloaded for free from our website. It also includes source code samples for VBScript and other programming languages.

Source Code Files:

```
' Create Bytescout.PDFExtractor.JSONExtractor object
Set extractor = CreateObject("Bytescout.PDFExtractor.JSONExtractor")

extractor.RegistrationName = "demo"
extractor.RegistrationKey = "demo"

' Load sample PDF document
extractor.LoadDocumentFromFile "../../sample1.pdf"

' Uncomment this line to get rid of empty nodes in JSON
'extractor.PreserveFormattingOnTextExtraction = False

' Set output image format
extractor.ImageFormat = 0 ' 0 = PNG; 1 = JPEG; 2 = GIF; 3 = BMP

' Save images to external files
extractor.SaveImages = 1 ' 1 = ImageHandling.OuterFile
extractor.ImageFolder = "images" ' Folder for external images
extractor.SaveJSONToFile "result_with_external_images.json"

' Embed images into JSON as Base64 encoded string
extractor.SaveImages = 2 ' 2 = ImageHandling.Embed
extractor.SaveJSONToFile "result_with_embedded_images.json"

WScript.Echo "Done."
```
