

## How to extract image coordinates by page from pdf with pdf extractor sdk in VBScript and ByteScout Premium Suite

Learn to code in VBScript to extract image coordinates by page from pdf with pdf extractor sdk with this step-by-step tutorial

We made thousands of pre-made source code pieces for easy implementation in your own programming projects. ByteScout Premium Suite is the set that includes 12 SDK products from ByteScout including tools and components for PDF, barcodes, spreadsheets, screen video recording and you can use it to extract image coordinates by page from pdf with pdf extractor sdk with VBScript.

The SDK samples given below describe how to quickly make your application do extract image coordinates by page from pdf with pdf extractor sdk in VBScript with the help of ByteScout Premium Suite. Simply copy and paste in your VBScript project or application you and then run your app! Use of ByteScout Premium Suite in VBScript is also described in the documentation included along with the product.

All these programming tutorials along with source code samples and ByteScout free trial version are available for download from our website.

Source Code Files:

```
' Create Bytescout.PDFExtractor.ImageExtractor object
Set extractor = CreateObject("Bytescout.PDFExtractor.ImageExtractor")
extractor.RegistrationName = "demo"
extractor.RegistrationKey = "demo"

' Load sample PDF document
extractor.LoadDocumentFromFile("../..\sample1.pdf")

' Get page count
pageCount = extractor.GetPageCount()

' Extract images from each page
For i = 0 To pageCount - 1
    j = 0
    ' Initialize page images enumeration
    If extractor.GetFirstPageImage(i) Then
        Do
            outputFileName = "page" & i & "image" & j & ".png"
            ' display coordinates of the image
            MsgBox "Image #" & CStr(j) & " on page #" & CStr(i) & vbCRLF & "Coordinates: " & CStr( extractor.GetCurrentImageRectangle_Left()) & ", " & CStr( extractor.GetCurrentImageRectangle_Top()) & ", " & CStr( extractor.GetCurrentImageRectangle_Width()) & ", " & CStr( extractor.GetCurrentImageRectangle_Height())"
            j = j + 1
        Loop While extractor.GetNextImage() ' Advance image enumeration
    End If
Next

Set extractor = Nothing
```
