

How to capture entire screen video with transparent windows in VBScript and VB6 and ByteScout Screen Capturing SDK

This tutorial will show how to capture entire screen video with transparent windows in VBScript and VB6

With this source code sample you may quickly learn how to capture entire screen video with transparent windows in VBScript and VB6. What is ByteScout Screen Capturing SDK? It is the SDK for developers for quick implementation of screen video recording. The SDK records screen into video or into a series of screenshots. Can also record audio. Saves video into AVI,WMV and Google's WebM. Output video quality, size, resolution or framerate can be adjusted easily. Provides additional tools for privacy features like blacking out on screen areas with sensitive information on screen right during recording. Supports web camera as input and can add instant text and images into video output. It can help you to capture entire screen video with transparent windows in your VBScript and VB6 application.

You will save a lot of time on writing and testing code as you may just take the VBScript and VB6 code from ByteScout Screen Capturing SDK for capture entire screen video with transparent windows below and use it in your application. Follow the instructions from the scratch to work and copy the VBScript and VB6 code. Code testing will allow the function to be tested and work properly with your data.

Free trial version of ByteScout Screen Capturing SDK is available for download from our website. Get it to try other source code samples for VBScript and VB6.

Source Code Files:

CaptureScreenWithTransparentControls.vbs

```
' create video capturer activex object
Set capturer = CreateObject("BytescoutScreenCapturing.Capturer")

' set output video file name to .WMV or .AVI file
capturer.OutputFileName = "EntireScreenCaptured.wmv"

' set capturing type to the caScreen =3 to capture the entire screen
capturer.CapturingType = 3

' output video width
capturer.OutputWidth = 640

' output video height
capturer.OutputHeight = 480

capturer.SetLogFile "log.txt"

' enabling recording of semitransparent or layered windows (Warning: may cause mouse c
capturer.CaptureTransparentControls = true

' uncomment to set Bytescout Lossless Video format output video compression method
' do not forget to set file to .avi format if you use Video Codec Name
' capturer.CurrentVideoCodecName = "Bytescout Lossless";

MsgBox "This script will record 640x480 video from entire screen for 15 seconds. Output

' run video capturing
capturer.Run()

' IMPORTANT: if you want to check for some code if need to stop the recording then make
' using Thread.Sleep(1) inside the checking loop, so you have the loop like
' Do
' Thread.Sleep(1)
' While StopButtonNotClicked

' wait for 15 seconds (15000 msec)
WScript.Sleep(15000)

' stop capturing
capturer.Stop()

' destroy Capturer object so the video will be saved into the disk
Set capturer = Nothing
```
