

# How to capture entire screen to HD WMV video in VBScript and VB6 and ByteScout Screen Capturing SDK

## Tutorial on how to capture entire screen to HD WMV video in VBScript and VB6

On this page you will learn from code samples for programming in VBScript and VB6. Writing of the code to capture entire screen to HD WMV video in VBScript and VB6 can be done by developers of any level using ByteScout Screen Capturing SDK. ByteScout Screen Capturing SDK can capture entire screen to HD WMV video. It can be used from VBScript and VB6. ByteScout Screen Capturing SDK is the tool for developers who want to add screen capturing in their application. Can record screen into video and into single screenshots. Output formats are WMV, AVI, WebM for video and PNG for screenshots. You can adjust output video size, quality, resolution, framerate, video and audio codecs. Includes special privacy features for blacking out sensitive information on screen. Can also capture video from web camera, can add overlays with text or images.

The SDK samples like this one below explain how to quickly make your application do capture entire screen to HD WMV video in VBScript and VB6 with the help of ByteScout Screen Capturing SDK. In order to implement the functionality, you should copy and paste this code for VBScript and VB6 below into your code editor with your app, compile and run your application. Enjoy writing a code with ready-to-use sample VBScript and VB6 codes.

You can download free trial version of ByteScout Screen Capturing SDK from our website to see and try many others source code samples for VBScript and VB6.

## Source Code Files:

CaptureScreenToHDWMV.vbs

```
' create video capturer activex object
Set capturer = CreateObject("BytescoutScreenCapturing.Capturer")

' set output video file name to .WMV
capturer.OutputFileName = "EntireScreenCapturedHD.wmv"

' set capturing type to the caScreen =3 to capture the entire screen
capturer.CapturingType = 3

' set bitrate to 10 mb/sec - high bitrate is required for HD video
capturer.WMVVideoBitrate = 1024*1024*10

' output video width and height to HD video size 1920x1080
capturer.OutputWidth = 1920
capturer.OutputHeight = 1080

' uncomment to enable recording of semitransparent or layered windows (Warning: may ca
' capturer.CaptureTransparentControls = true

MsgBox "This script will record 1920x1080 video from entire screen for 15 seconds. Outp

' run video capturing
capturer.Run()

' IMPORTANT: if you want to check for some code if need to stop the recording then make
' using Thread.Sleep(1) inside the checking loop, so you have the loop like
' Do
' Thread.Sleep(1)
' While StopButtonNotClicked

' wait for 15 seconds (15000 msec)
WScript.Sleep(15000)

' stop capturing
capturer.Stop()

' destroy Capturer object so the video will be saved into the disk
Set capturer = Nothing

MsgBox "Ready! Check EntireScreenCapturedHD.wmv"
```
