

How to capture screen video around mouse in VBScript and VB6 using ByteScout Screen Capturing SDK

Tutorial on how to capture screen video around mouse in VBScript and VB6

Learn how to capture screen video around mouse in VBScript and VB6 with this source code sample. ByteScout Screen Capturing SDK is the SDK for developers for quick implementation of screen video recording. The SDK records screen into video or into a series of screenshots. Can also record audio. Saves video into AVI, WMV and Google's WebM. Output video quality, size, resolution or framerate can be adjusted easily. Provides additional tools for privacy features like blacking out on screen areas with sensitive information on screen right during recording. Supports web camera as input and can add instant text and images into video output. It can be used to capture screen video around mouse using VBScript and VB6.

This rich sample source code in VBScript and VB6 for ByteScout Screen Capturing SDK includes the number of functions and options you should do calling the API to capture screen video around mouse. In your VBScript and VB6 project or application you may simply copy & paste the code and then run your app! Enjoy writing a code with ready-to-use sample codes in VBScript and VB6.

ByteScout Screen Capturing SDK free trial version is available on our website. VBScript and VB6 and other programming languages are supported.

Source Code Files:

CaptureRegionAroundMouse.vbs

```
' create video capturer activex object
Set capturer = CreateObject("BytescoutScreenCapturing.Capturer")

' set output video file name (WMV), you can also set to AVI
capturer.OutputFileName = "RegionAroundMouseCaptured.wmv"

' set capturing type to the caMouse =2 to capture the region around the mouse curosr.
capturer.CapturingType = 2

' set width of the rectangle to capture from
capturer.CaptureRectWidth = 640
' set height of the rectangle to capture from
capturer.CaptureRectHeight = 480

' set width of the output video
capturer.OutputWidth = 640
' set height of the output video
capturer.OutputHeight = 480

' uncomment to enable recording of semitransparent or layered windows (Warning: may ca
' capturer.CaptureTransparentControls = true

' set border type to show around captured area
capturer.CaptureAreaBorderType = 2 ' CaptureAreaBorderType.cabtDashed;

' uncomment to set Bytescout Lossless Video format output video compression method
' do not forget to set file to .avi format if you use Video Codec Name
' capturer.CurrentVideoCodecName = "Bytescout Lossless"

MsgBox "Script will record 640x480 region around the mouse cursor for 10 seconds. Outpu

' run video capturing
capturer.Run()

' IMPORTANT: if you want to check for some code if need to stop the recording then make
' using Thread.Sleep(1) inside the checking loop, so you have the loop like
' Do
' Thread.Sleep(1)
' While StopButtonNotClicked

' wait for 15 seconds (15000 msec)
WScript.Sleep(15000)

' stop capturing
capturer.Stop()

' destroy Capturer object so the video will be saved into the disk
Set capturer = Nothing
```
