How to set WMV video bitrate in VBScript and VB6 and ByteScout Screen Capturing SDK

The tutorial below will demonstrate how to set WMV video bitrate in VBScript and VB6

On this page you will learn from code samples for programming in VBScript and VB6.Writing of the code to set WMV video bitrate in VBScript and VB6 can be done by developers of any level using ByteScout Screen Capturing SDK. Want to set WMV video bitrate in your VBScript and VB6 app? ByteScout Screen Capturing SDK is designed for it. ByteScout Screen Capturing SDK is the screen video recording SDK helps in quick implementation of screen video recording. WMV, AVI, WebM output options are available with adjustable quality, video size, framerate and video and audio codec. Includes special features like live multiple blacking out of selected areas, recording from web cam as main source and as overlay, optional watermarks for output video.

You will save a lot of time on writing and testing code as you may just take the VBScript and VB6 code from ByteScout Screen Capturing SDK for set WMV video bitrate below and use it in your application. In order to implement the functionality, you should copy and paste this code for VBScript and VB6 below into your code editor with your app, compile and run your application. Further enhancement of the code will make it more vigorous.

You can download free trial version of ByteScout Screen Capturing SDK from our website to see and try many others source code samples for VBScript and VB6.

Source Code Files:

Set WMV Bitrate.vbs

```vbs
' create video capturer activex object
Set capturer = CreateObject("BytescoutScreenCapturing.Capturer")

' set output video file name to .WMV or .AVI file
capturer.OutputFileName = "SetWMVBitrate.wmv"

' set the bitrate to 1000 * 1024 * 1024
capturer.WMVVideoBitrate = 1000 * 1024 * 1024

' set capturing type to the caScreen =3 to capture the entire screen
capturer.CapturingType = 3

' output video width
capturer.OutputWidth = 640

' output video height
capturer.OutputHeight = 480

' uncomment to set Bytescout Lossless Video format output video compression method
' do not forget to set file to .avi format if you use Video Codec Name
' capturer.CurrentVideoCodecName = "Bytescout Lossless";

' uncomment to enable recording of semitransparent or layered windows (Warning: may ca
' capturer.CaptureTransparentControls = true

MsgBox "This script will record 640x480 video from entire screen for 15 seconds. Outpu

' run video capturing
capturer.Run()

' IMPORTANT: if you want to check for some code if need to stop the recording then make
' using Thread.Sleep(1) inside the checking loop, so you have the loop like
' Do
' Thread.Sleep(1)
' While StopButtonNotClicked

' wait for 15 seconds (15000 msec)
WScript.Sleep(15000)

' stop capturing
capturer.Stop()

' destroy Capturer object so the video will be saved into the disk
Set capturer = Nothing
```
