

How to add images to spreadsheet in C# with ByteScout Spreadsheet SDK

Tutorial on how to add images to spreadsheet in C#

The code below will help you to implement an C# app to add images to spreadsheet. Want to add images to spreadsheet in your C# app? ByteScout Spreadsheet SDK is designed for it. ByteScout Spreadsheet SDK is the SDK component for writing, reading, modifying and calculating Excel and CSV spreadsheets. Can calculate and recalculate formulas with Excel installed. You may import or export data to and from CSV, XML, JSON. Supports export to databases, arrays, streams.

C# code samples for C# developers help to speed up coding of your application when using ByteScout Spreadsheet SDK. Just copy and paste the code into your C# application's code and follow the instruction. You can use these C# sample examples in one or many applications.

Trial version of ByteScout Spreadsheet SDK is available for free. Source code samples are included to help you with your C# app.

Program.cs

```

using System;
using System.Collections.Generic;
using System.Diagnostics;
using System.IO;
using System.Text;
using Bytescout.Spreadsheet;

namespace AddImages
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create spreadsheet
            Spreadsheet doc = new Spreadsheet();
            // Add worksheet
            Worksheet worksheet = doc.Worksheets.Add();

            // Put an image on the worksheet with 10 pixel margin from the
            worksheet.Pictures.Add("image1.jpg", 10, 10);
            // Put second image to 200 pixel offset and resize it to 250x200
            worksheet.Pictures.Add("image2.jpg", 200, 200, 250, 200);

            // Delete output file if exists
            if (File.Exists("output.xls"))
            {
                File.Delete("output.xls");
            }

            // Save document
            doc.SaveAs("output.xls");

            // Close spreadsheet
            doc.Close();

            // Open generated XLS document in default application
            Process.Start("output.xls");

            doc.Dispose();
        }
    }
}

```
