

## How to add rows into existing spreadsheet in C# using ByteScout Spreadsheet SDK

This tutorial will show how to add rows into existing spreadsheet in C#

Add rows into existing spreadsheet is easy to implement in C# if you use these source codes below. ByteScout Spreadsheet SDK is the SDK that can write and read, modify and calculate Excel and CSV spreadsheets. Most popular formulas are supported. You may import or export data to and from CSV, XML, JSON as well as to and from databases, arrays. It can add rows into existing spreadsheet in C#.

You will save a lot of time on writing and testing code as you may just take the C# code from ByteScout Spreadsheet SDK for add rows into existing spreadsheet below and use it in your application. Just copy and paste the code into your C# application's code and follow the instruction. Implementing C# application typically includes multiple stages of the software development so even if the functionality works please test it with your data and the production environment.

Trial version of ByteScout Spreadsheet SDK can be downloaded for free from our website. It also includes source code samples for C# and other programming languages.

using System.Text;
using Bytescout.Spreadsheet;
using System.Diagnostics;
using System.IO;

namespace Adding_rows_to_existing_XLS
{
    class Program
    {
        static void Main(string[] args)
        {
            // Open Spreadsheet
            Spreadsheet document = new Spreadsheet();
            document.LoadFromFile("AdvancedReport.xls");

            // Get Worksheet
            Worksheet worksheet = document.Workbook.Worksheets[0];

            // Add new row
            worksheet.Rows.Insert(6, 1);
            // Set values
            worksheet.Rows[6][0].Value = "New Name";
            worksheet.Rows[6][1].Value = "New Full Name";

            // delete output file if exists already
            if (File.Exists("AdvancedReport_Modified.xls")){
                File.Delete("AdvancedReport_Modified.xls");
            }

            // Save document
            document.SaveAs("AdvancedReport_Modified.xls");

            // Close Spreadsheet
            document.Close();

            // open in default spreadsheets viewer/editor
            Process.Start("AdvancedReport_Modified.xls");
        }
    }
}
```
