

How to convert CSV to XLS in C# with ByteScout Spreadsheet SDK

The tutorial below will demonstrate how to convert CSV to XLS in C#

ByteScout tutorials are designed to explain the code for both C# beginners and advanced programmers. Want to convert CSV to XLS in your C# app? ByteScout Spreadsheet SDK is designed for it. ByteScout Spreadsheet SDK is the SDK component for writing, reading, modifying and calculating Excel and CSV spreadsheets. Can calculate and recalculate formulas with Excel installed. You may import or export data to and from CSV, XML, JSON. Supports export to databases, arrays, streams.

Fast application programming interfaces of ByteScout Spreadsheet SDK for C# plus the instruction and the code below will help you quickly learn how to convert CSV to XLS. Just copy and paste the code into your C# application's code and follow the instruction. Implementing C# application typically includes multiple stages of the software development so even if the functionality works please test it with your data and the production environment.

You can download free trial version of ByteScout Spreadsheet SDK from our website to see and try many others source code samples for C#.

C# - Program.cs

```
using System;
using System.Collections.Generic;
using System.Text;
using Bytescout.Spreadsheet;
using System.IO;
using System.Diagnostics;

namespace HelloWorld
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new Spreadsheet
            Spreadsheet document = new Spreadsheet();

            // load csv file
            document.LoadFromFile("input.csv");

            // Save document
            document.SaveAs("Output.xls");

            // Close Spreadsheet
            document.Close();
        }
    }
}
```

```
        // open generated XLS document in default program
        Process.Start("Output.xls");
    }
}
```
