

How to add background image in VB.NET using ByteScout Spreadsheet SDK

This tutorial will show how to add background image in VB.NET

The sample shows steps and algorithm of how to add background image and how to make it work in your VB.NET application. ByteScout Spreadsheet SDK can add background image. It can be used from VB.NET. ByteScout Spreadsheet SDK is the library (SDK) that is capable of writing, reading, modifying and calculating Excel and CSV spreadsheets. Most popular formulas can be calculated and recalculated with Excel installed. You may import or export data to and from CSV, XML, JSON as well as to and from databases, arrays.

This rich sample source code in VB.NET for ByteScout Spreadsheet SDK includes the number of functions and options you should do calling the API to add background image. This VB.NET sample code is all you need for your app. Just copy and paste the code, add references (if needs to) and you are all set! Enjoy writing a code with ready-to-use sample VB.NET codes.

Trial version of ByteScout Spreadsheet SDK is available for free. Source code samples are included to help you with your VB.NET app.

Source Code Files:

```
Imports System.Diagnostics
Imports System.Drawing
Imports System.IO
Imports Bytescout.Spreadsheet

Class Program

    Friend Shared Sub Main(args As String())

        ' Create new spreadsheet (or open existing)
        Dim doc As New Spreadsheet()
        doc.RegistrationName = "demo"
        doc.RegistrationKey = "demo"

        ' Add worksheet
        Dim worksheet As Worksheet = doc.Worksheets.Add()

        ' Put background image on the worksheet
        worksheet.BackgroundImage = Image.FromFile("image1.jpg")

        ' Save document
        doc.SaveAs("output.xls")

        ' Close spreadsheet
        doc.Close()

        ' Open generated XLS document in default application
        Process.Start("output.xls")

        doc.Dispose()

    End Sub

End Class
```
