

How to add header and footer in VB.NET with ByteScout Spreadsheet SDK

The tutorial below will demonstrate how to add header and footer in VB.NET

The documentation is designed to help you to implement the features on your side. ByteScout Spreadsheet SDK is the library (SDK) that is capable of writing, reading, modifying and calculating Excel and CSV spreadsheets. Most popular formulas can be calculated and recalculated with Excel installed. You may import or export data to and from CSV, XML, JSON as well as to and from databases, arrays. It can be used to add header and footer using VB.NET.

You will save a lot of time on writing and testing code as you may just take the VB.NET code from ByteScout Spreadsheet SDK for add header and footer below and use it in your application. Follow the instructions from the scratch to work and copy the VB.NET code. Further enhancement of the code will make it more vigorous.

Free trial version of ByteScout Spreadsheet SDK is available for download from our website. Get it to try other source code samples for VB.NET.

Source Code Files:

```
Imports System.Diagnostics
Imports System.IO
Imports Bytescout.Spreadsheet

Class Program
    Friend Shared Sub Main(ByVal args As String())

        ' Create new Spreadsheet object
        Dim doc As New Spreadsheet()

        ' Add worksheet
        Dim worksheet As Worksheet = doc.Worksheets.Add()

        ' Add headers:

        ' add date as left header
        worksheet.PageSetup.LeftHeader = "&D"
        ' add label with custom font as center header
        worksheet.PageSetup.CenterHeader = "&" & "Verdana,bold" & "14Laws && Rights"
        ' add time as right header
        worksheet.PageSetup.RightHeader = "&T"

        ' Add footers:

        ' add file name as left footer
        worksheet.PageSetup.LeftFooter = "&F"
        ' add "page of pages" indicator as center footer
        worksheet.PageSetup.CenterFooter = "&P/&N"
        ' add simple text as right footer
        worksheet.PageSetup.RightFooter = "Right footer"

        ' Add worksheet content
        worksheet.Cell(1, 1).Value = "Click Print Preview to see headers and footers."

        ' Delete output file if exists
        If File.Exists("output.xls") Then
            File.Delete("output.xls")
        End If

        ' Save document
        doc.SaveAs("output.xls")

        ' Close spreadsheet
        doc.Close()
        doc.Dispose()

        ' Open generated XLS document in default application
        Process.Start("output.xls")

    End Sub
End Class
```
