

# How to convert XLS to CSV in VB.NET using ByteScout Spreadsheet SDK

## Tutorial on how to convert XLS to CSV in VB.NET

Convert XLS to CSV is easy to implement in VB.NET if you use these source codes below. ByteScout Spreadsheet SDK is the library (SDK) that is capable of writing, reading, modifying and calculating Excel and CSV spreadsheets. Most popular formulas can be calculated and recalculated with Excel installed. You may import or export data to and from CSV, XML, JSON as well as to and from databases, arrays. It can convert XLS to CSV in VB.NET.

This rich sample source code in VB.NET for ByteScout Spreadsheet SDK includes the number of functions and options you should do calling the API to convert XLS to CSV. In order to implement the functionality, you should copy and paste this code for VB.NET below into your code editor with your app, compile and run your application. Test VB.NET sample code examples whether they respond your needs and requirements for the project.

Free trial version of ByteScout Spreadsheet SDK is available for download from our website. Get it to try other source code samples for VB.NET.

VB.NET - Module1.vb

```
Imports Bytescout.Spreadsheet
Imports System.IO
Imports System.Diagnostics

Module Module1

    Sub Main()
        ' Open Spreadsheet
        Dim document As New Spreadsheet()
        document.LoadFromFile("SimpleReport.xls")

        ' remove output file if already exists
        If File.Exists("SimpleReport.csv") Then
            File.Delete("SimpleReport.csv")
        End If

        document.Workbook.Worksheets(0).SaveAsCSV("SimpleReport.csv")
        document.Close()

        ' open output document in default viewer
        Process.Start("SimpleReport.csv")
    End Sub
End Module
```

End Sub

End Module
