

How to export to JSON in VB.NET with ByteScout Spreadsheet SDK

The tutorial shows how to export to JSON in VB.NET

These source code samples are listed and grouped by their programming language and functions they use. ByteScout Spreadsheet SDK is the SDK that can write and read, modify and calculate Excel and CSV spreadsheets. Most popular formulas are supported. You may import or export data to and from CSV, XML, JSON as well as to and from databases, arrays and you can use it to export to JSON with VB.NET.

This rich sample source code in VB.NET for ByteScout Spreadsheet SDK includes the number of functions and options you should do calling the API to export to JSON. Just copy and paste the code into your VB.NET application's code and follow the instruction. Further enhancement of the code will make it more vigorous.

ByteScout free trial version is available for download from our website. It includes all these programming tutorials along with source code samples.

VB.NET - Module1.vb

```
Imports Bytescout.Spreadsheet
Imports System.IO

Module Module1

    Sub Main()

        Using spreadsheet As New Spreadsheet

            ' Load document
            spreadsheet.LoadFromFile("Table.xls")

            ' Export first worksheet to JSON format
            Dim jsonString As String = spreadsheet.ExportToJson(0)

            ' Write JSON string to file
            File.WriteAllText("exported.json.txt", jsonString)

            ' Open the result file in default associated application
            Process.Start("exported.json.txt")

        End Using

    End Sub

End Module
```
