

# How to read CSV file in VB.NET using ByteScout Spreadsheet SDK

This code in VB.NET shows how to read CSV file with this how to tutorial

The code below will help you to implement an VB.NET app to read CSV file. What is ByteScout Spreadsheet SDK? It is the SDK component for writing, reading, modifying and calculating Excel and CSV spreadsheets. Can calculate and recalculate formulas with Excel installed. You may import or export data to and from CSV, XML, JSON. Supports export to databases, arrays, streams. It can help you to read CSV file in your VB.NET application.

Fast application programming interfaces of ByteScout Spreadsheet SDK for VB.NET plus the instruction and the code below will help you quickly learn how to read CSV file. In order to implement the functionality, you should copy and paste this code for VB.NET below into your code editor with your app, compile and run your application. Further enhancement of the code will make it more vigorous.

Trial version of ByteScout Spreadsheet SDK is available for free. Source code samples are included to help you with your VB.NET app.

VB.NET - Module1.vb

```
Imports Bytescout.Spreadsheet
Imports System.IO

Module Module1

    Sub Main()
        ' Create new Spreadsheet
        Dim document As New Spreadsheet()
        document.LoadFromFile("Hello_world.csv")

        ' Get first worksheet
        Dim worksheet As Worksheet = document.Workbook.Worksheets(0)

        ' Read cell value
        Console.WriteLine("Cell (0,0) value: {0}", worksheet.Cell(0, 0).Value)

        ' Write message
        Console.Write("Press any key to continue...")

        ' Wait user input
        Console.ReadKey()

    End Sub

End Module
```
