

How to export to HTML in VBScript using ByteScout Spreadsheet SDK

How to export to HTML in VBScript

We made thousands of pre-made source code pieces for easy implementation in your own programming projects. ByteScout Spreadsheet SDK is the library (SDK) that is capable of writing, reading, modifying and calculating Excel and CSV spreadsheets. Most popular formulas can be calculated and recalculated with Excel installed. You may import or export data to and from CSV, XML, JSON as well as to and from databases, arrays. It can export to HTML in VBScript.

VBScript code samples for VBScript developers help to speed up coding of your application when using ByteScout Spreadsheet SDK. In your VBScript project or application you may simply copy & paste the code and then run your app! Use of ByteScout Spreadsheet SDK in VBScript is also explained in the documentation included along with the product.

Trial version of ByteScout Spreadsheet SDK can be downloaded for free from our website. It also includes source code samples for VBScript and other programming languages.

VBScript - ExcelToHtml.vbs

```
Set document = CreateObject("Bytescout.Spreadsheet.Spreadsheet")

document.RegistrationName = "demo"
document.RegistrationKey = "demo"

document.LoadFromFile("TestForHtmlExport.xls")

' Export whole document to set of HTML files
document.SaveAsHTML "Document.html"

' Export single worksheet
document.Worksheets.Item(0).SaveAsHTML "Worksheet1.html"
```
