How to add diagonal text watermark for text fits page diagonal in C# with ByteScout Watermarking SDK

Step By Step Tutorial: how to add diagonal text watermark for text fits page diagonal in C#

On this page you will learn from code samples for programming in C#. Text fits page diagonal in C# can be implemented with ByteScout Watermarking SDK. ByteScout Watermarking SDK is the powerful SDK can apply high quality visible and semivisible watermarks into PNG, JPG, BMP pictures and TIFF scans. Doznes of presets are available, multiple watermarks can be applied. Can add logo based watermark from image, can adjust font size, font family, colors.

Fast application programming interfaces of ByteScout Watermarking SDK for C# plus the instruction and the code below will help to learn how to add diagonal text watermark. For implimentation of this functionality, please copy and paste code below into your app using code editor. Then compile and run your app. This basic programming language sample code for C# will do the whole work for you in implementing text fits page diagonal in your app.

ByteScout free trial version is available for FREE download from our website. Programming tutorials along with source code samples are included.

Program.cs

```csharp
using System;
using System.Diagnostics;
using System.Drawing;
using System.Collections.Generic;
using Bytescout.Watermarking;
using Bytescout.Watermarking.Presets;

namespace Sample
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create Watermarker instance
            Watermarker waterMarker = new Watermarker();

            // Initialize library
            waterMarker.InitLibrary("demo", "demo");

            // Set input file name
            string inputFilePath = "my_sample_image.jpg";
            // Set output file title
            string outputFilePath = "my_sample_output.jpg";

            // Add image to apply watermarks to
            waterMarker.AddInputFile(inputFilePath, outputFilePath);

            // Create new watermark
            TextFitsPageDiagonal preset = new TextFitsPageDiagonal();

            // Set watermark text
            preset.Text = "Bytescout Watermarking";

            // Add watermark to watermarker
            waterMarker.AddWatermark(preset);

            // Set output directory
            waterMarker.OutputOptions.OutputDirectory = ".";

            // Apply watermarks
            waterMarker.Execute();

            // open generated image file in default image viewer installed in Windows
            Process.Start(outputFilePath);
        }
    }
}
```
