

## How to add tiled vertical text watermark for tiled text vertical in C# and ByteScout Watermarking SDK

How to add tiled vertical text watermark in C# with easy ByteScout code samples to make tiled text vertical. Step-by-step tutorial

Every ByteScout tool contains example C# source codes that you can find here or in the folder with installed ByteScout product. Tiled text vertical in C# can be implemented with ByteScout Watermarking SDK. ByteScout Watermarking SDK is the powerful SDK can apply high quality visible and semivisible watermarks into PNG, JPG, BMP pictures and TIFF scans. Dozens of presets are available, multiple watermarks can be applied. Can add logo based watermark from image, can adjust font size, font family, colors.

C# code snippet like this for ByteScout Watermarking SDK works best when you need to quickly implement tiled text vertical in your C# application. For implementation of this functionality, please copy and paste code below into your app using code editor. Then compile and run your app. You can use these C# sample examples in one or many applications.

Our website provides free trial version of ByteScout Watermarking SDK that includes source code samples to help with your C# project.

Source Code Files:

```
using System;
using System.Diagnostics;
using System.Drawing;
using System.Collections.Generic;
using Bytescout.Watermarking;
using Bytescout.Watermarking.Presets;

namespace Sample
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create Watermarker instance
            Watermarker waterMarker = new Watermarker();

            // Initialize library
            waterMarker.InitLibrary("demo", "demo");

            // Set input file name
            string inputFilePath = "my_sample_image.jpg";
            // Set output file title
            string outputFilePath = "my_sample_output.jpg";

            // Add image to apply watermarks to
            waterMarker.AddInputFile(inputFilePath, outputFilePath);

            // Create new watermark
            TiledTextVertical preset = new TiledTextVertical();

            // Set text
            preset.Text = "Sample text watermark";

            // Set font size
            preset.Font.Size = 4;
            preset.Transparency = 25;

            // Add watermark to watermarker
            waterMarker.AddWatermark(preset);

            // Set output directory
            waterMarker.OutputOptions.OutputDirectory = ".";

            // Apply watermarks
            waterMarker.Execute();

            // open generated image file in default image viewer installed in Windows
            Process.Start(outputFilePath);
        }
    }
}
```
