

How to add vertical text watermark for simple vertical text in C# using ByteScout Watermarking SDK

How to add vertical text watermark for simple vertical text in C#: How To Tutorial

The sample source codes on this page will demonstrate you how to make simple vertical text in C#. ByteScout Watermarking SDK was made to help with simple vertical text in C#. ByteScout Watermarking SDK is the powerful SDK can apply high quality visible and semivisible watermarks into PNG, JPG, BMP pictures and TIFF scans. Dozens of presets are available, multiple watermarks can be applied. Can add logo based watermark from image, can adjust font size, font family, colors.

This rich sample source code in C# for ByteScout Watermarking SDK includes the number of functions and options you should do calling the API to implement simple vertical text. Sample code in C# is all you need. Copy-paste it to your the code editor, then add a reference to ByteScout Watermarking SDK and you are ready to try it! Use of ByteScout Watermarking SDK in C# is also explained in the documentation included along with the product.

ByteScout free trial version is available for FREE download from our website. Programming tutorials along with source code samples are included.

using Bytescout.Watermarking.Presets;

namespace Sample
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create Watermarker instance
            Watermarker waterMarker = new Watermarker();

            // Initialize library
            waterMarker.InitLibrary("demo", "demo");

            // Set input file name
            string inputFilePath = "my_sample_image.jpg";
            // Set output file title
            string outputFilePath = "my_sample_output.jpg";

            // Add image to apply watermarks to
            waterMarker.AddInputFile(inputFilePath, outputFilePath);

            // Create new watermark
            SimpleVerticalText preset = new SimpleVerticalText();

            // Set watermark text
            preset.Text = "Bytescout Watermarking";

            // Set watermark font
            preset.Font = new WatermarkFont("Tahoma", FontStyle.Regular, FontSizeType.Regular);

            // Add watermark to watermarker
            waterMarker.AddWatermark(preset);

            // Set output directory
            waterMarker.OutputOptions.OutputDirectory = ".";

            // Apply watermarks
            waterMarker.Execute();

            // open generated image file in default image viewer installed in Windows
            Process.Start(outputFilePath);
        }
    }
}
```
