

## How to add simple watermark for hello\_world\_vb in VB.NET with ByteScout Watermarking SDK

### How to add simple watermark for hello\_world\_vb in VB.NET: How To Tutorial

Sample source codes below will show you how to cope with a difficult task, for example, hello\_world\_vb in VB.NET. ByteScout Watermarking SDK was made to help with hello\_world\_vb in VB.NET. ByteScout Watermarking SDK is the software development kit that helps to quickly implement adding of watermarks on top of PNG, JPG, BMP images as well as on multipaged TIFF files. You may select ready to use presets or create your own preset with semitransparent logo images, text lines with adjustable font size, family, color, rotation.

You will save a lot of time on writing and testing code as you may just take the code below and use it in your application. This VB.NET sample code should be copied and pasted into your project. After doing this just compile your project and click Run. You can use these VB.NET sample examples in one or many applications.

Our website provides free trial version of ByteScout Watermarking SDK that includes source code samples to help with your VB.NET project.

Source Code Files:

```
Imports System.Diagnostics
Imports Bytescout.Watermarking
Imports Bytescout.Watermarking.Presets

Module Module1

    Sub Main()
        ' Create new watermarker
        Dim waterMarker As New Watermarker()
        ' Create new preset
        Dim preset As New TextFitsPage()
        ' Create new string
        Dim inputFilePath As String
        ' Create new string
        Dim outputFilePath As String

        ' Set input file path
        inputFilePath = "my_sample_image.jpg"
        ' Set output file path
        outputFilePath = "my_sample_output.jpg"

        ' Initialize library
        waterMarker.InitLibrary("demo", "demo")

        ' Add image to apply watermarks to
        waterMarker.AddInputFile(inputFilePath, outputFilePath)

        ' Set preset text
        preset.Text = "Bytescout Watermarking"

        ' Add watermark to watermarker
        waterMarker.AddWatermark(preset)

        ' Set output directory
        waterMarker.OutputOptions.OutputDirectory = "."

        ' Apply watermarks
        waterMarker.Execute()

        ' Open generated image file in default image viewer installed in Windows
        Process.Start(outputFilePath)

    End Sub

End Module
```
