

# How to add stamp watermark to image for stamps in VB.NET and ByteScout Watermarking SDK

## How to add stamp watermark to image for stamps in VB.NET: Step By Step Tutorial

Today we will explain the steps and algorithm of how to add stamp watermark to image and how to make it work in your application. ByteScout Watermarking SDK was made to help with stamps in VB.NET. ByteScout Watermarking SDK is the software development kit that helps to quickly implement adding of watermarks on top of PNG, JPG, BMP images as well as on multipaged TIFF files. You may select ready to use presets or create your own preset with semitransparent logo images, text lines with adjustable font size, family, color, rotation.

The SDK samples like this one below explain how to quickly make your application do stamps in VB.NET with the help of ByteScout Watermarking SDK. Open your VB.NET project and simply copy & paste the code and then run your app! You can use these VB.NET sample examples in one or many applications.

Our website provides free trial version of ByteScout Watermarking SDK that includes source code samples to help with your VB.NET project.

Source Code Files:

```
Imports Bytescout.Watermarking

Module Module1

    Sub Main()
        ' Create Watermarker instance
        Dim waterMarker As New Watermarker()

        ' Initialize library
        waterMarker.InitLibrary("demo", "demo")

        ' Set input file name
        Dim inputFilePath As String = "my_sample_image.jpg"

        For Each stampType As String In Presets.Stamp.PresetImages
            ' Set output file title
            Dim outputFilePath As String = "my_sample_output_" + stampType + ".jpg"

            ' Add image to apply watermarks to
            waterMarker.AddInputFile(inputFilePath, outputFilePath)

            ' Set output directory
            waterMarker.OutputOptions.OutputDirectory = "."

            ' Create new watermark
            Dim preset As New Presets.Stamp()

            ' Set stamp type
            preset.ImageFile = stampType

            ' Add watermark to watermarker
            waterMarker.AddWatermark(preset)

            ' Apply watermarks
            waterMarker.Execute()

            ' Clear all settings
            waterMarker.Clear()
        Next

    End Sub

End Module
```
