

How to add tiled vertical text watermark for tiled text vertical in VB.NET with ByteScout Watermarking SDK

Tutorial: how to add tiled vertical text watermark for tiled text vertical in VB.NET

The sample source codes on this page will demonstrate you how to make tiled text vertical in VB.NET. Tiled text vertical in VB.NET can be implemented with ByteScout Watermarking SDK. ByteScout Watermarking SDK is the powerful SDK can apply high quality visible and semivisible watermarks into PNG, JPG, BMP pictures and TIFF scans. Dozens of presets are available, multiple watermarks can be applied. Can add logo based watermark from image, can adjust font size, font family, colors.

You will save a lot of time on writing and testing code as you may just take the code below and use it in your application. This VB.NET sample code should be copied and pasted into your project. After doing this just compile your project and click Run. Writing VB.NET application typically includes multiple stages of the software development so even if the functionality works please test it with your data and the production environment.

ByteScout free trial version is available for FREE download from our website. Programming tutorials along with source code samples are included.

Source Code Files:

```
Imports Bytescout.Watermarking

Module Module1

    Sub Main()
        ' Create Watermarker instance
        Dim waterMarker As New Watermarker()

        ' Initialize library
        waterMarker.InitLibrary("demo", "demo")

        ' Set input file name
        Dim inputFilePath As String = "my_sample_image.jpg"
        ' Set output file title
        Dim outputFilePath As String = "my_sample_output.jpg"

        ' Add image to apply watermarks to
        waterMarker.AddInputFile(inputFilePath, outputFilePath)

        ' Create new watermark
        Dim preset As New Presets.TiledTextVertical()

        ' Set text
        preset.Text = "Sample text watermark"

        ' Set font size
        preset.Font.Size = 4
        preset.Transparency = 25

        ' Add watermark to watermarker
        waterMarker.AddWatermark(preset)

        ' Set output directory
        waterMarker.OutputOptions.OutputDirectory = "."

        ' Apply watermarks
        waterMarker.Execute()

        ' open generated image file in default image viewer installed in Windows
        Process.Start(outputFilePath)

    End Sub

End Module
```
